Mr. Dennis D. Dammerman  
Senior Vice President - Finance  
General Electric Company  
3135 Easton Turnpike  
Fairfield, CT 06431

Dear Mr. Dammerman:

We have applied certain agreed-upon procedures, as discussed below, with respect to Part B, Closure or Post-Closure Care and Liability Coverage, of your letter on behalf of General Electric Company to the United States Environmental Protection Agency dated March 25, 1991. It is understood that these procedures were performed solely to assist you in connection with filing the above mentioned letter, and our report is not to be used for any other purpose. Our procedures and findings are as follows:

- The dollar amount of tangible net worth included under Part B, Alternative II, item 7, letter page three - We compared the dollar amount of tangible net worth (\$12,347 million), which represents total share owners' equity less total intangible assets, to the difference between the amounts shown on the "Statement of Financial Position" page 26 of the Company's 1990 Annual Report for total share owners' equity (\$21,680 million) and intangible assets (\$9,333 million) and found such amounts to be in agreement.
- Total assets in the United States included under Part B, Alternative II, item 8, letter page three - We compared the total assets in the United States (\$137,572 million) to the amount of United States assets included in the geographic segment information disclosed in Note 33 on page 66 of the Company's 1990 Annual Report and found such amounts to be in agreement.
- Calculation of whether at least 90% of assets are located in the United States included under Part B, Alternative II, item 11, letter page three - To determine that the "No" response was correct, we compared the amount of United States assets (\$137,572 million) included in the geographic segment information disclosed in Note 33 on page 66 of the Company's 1990 Annual Report to the product of 90% times total assets (\$153,884 million) as shown on the "Statement of Financial Position" page 26 of the Company's 1990 Annual Report and found that the dollar amount of assets in the United States was less than the result of the computation described above.

Mr. Dammerman

Because the above procedures do not constitute an audit made in accordance with generally accepted auditing standards, we express no opinion on any of the items referred to above. In connection with the procedures referred to above, no matters came to our attention that caused us to believe that the specified amounts or items should be adjusted. Had we performed additional procedures, matters might have come to our attention that would have been reported to you. This report relates only to the amounts and items specified above and does not extend to any financial statements of General Electric Company and consolidated affiliates taken as a whole.

Very truly yours,

*KPM & Peat Marwick*
